# Electro/Set 432 MCK Perforating Keyboard

**The Ideal Keyboard for Simplifying Complex Computer and Phototypesetting Commands**

The Electro/Set 432 MCK keyboard features sixteen multiple code keys, each of which can generate a string of up to seven codes from a single keystroke. The multiple code keys are logically arranged in a row above the top row of character keys . . . within touch typing reach. They speed up production on repetitive data, reduce chances for operator error and cut production costs.

And operators appreciate the smooth feather light touch of Electro/Set. It's comparable to an electric typewriter.

**Double the Formats**

An optional split code feature of the Electro/Set 432 MCK permits the selection of 32 formats from the 16 multiple code keys thereby doubling the amount of formats. Each key will then generate a string of codes in a 4/3 or 5/2 code combination. Codes can be generated in a variety of structures on 6, 7 or 8 level perforated tape.

**Easy to Program**

Each of the multiple code keys has its own individual program card which governs the code structure of that particular key. These program cards are of the 'plug-in' variety and can easily be changed in less than a minute by removing the card and inserting another with a different code structure. Format versatility is therefore unlimited.

**Fastest and Most Efficient**

Operators can produce text fast and accurately—as well as complex computer and phototypesetting commands.

At 50 characters per second, the Electro/Set is the fastest and most efficient electronic keyboard available. Operators don't have to wait until the keyboard catches up with their speed nor will they be bothered by keyboard lock-ups or reset buttons.

**Versatile**

When you select an Electro/Set 432 MCK keyboard, you don't have to settle for a standard keyboard arrangement; keyboards can be customized to meet specific needs. Keyboard arrangements, indicator lights and code structures can be changed to meet particular requirements. Result: maximum efficiency and greater productivity.

An expanded model, the Electro/Set 432C MCK, has counting compatibility. It is equipped with additional electronics to accept the Electro/Set 433 'plug-in' Justifier module. The combination (Electro/Set 432C MCK plus Electro/Set 433 Justifier module) is designated as the Electro/Set 462 MCK. This keyboard permits the operator to automatically justify line endings.

**Reliable**

Electro/Set 432 MCK uses highly reliable electronics that are designed around MSI integrated circuits. Circuit boards can be changed in just minutes. And as added assurance of the continuous production of a large volume of tape, Electro/Set 432 MCK is backed by the VariTyper Division. Service and training are by locally-based specialists.

# Specifications
# Electro/Set 432 MCK

**Type**
Electronic with MSI and other solid state circuitry

**Output**
Non-justified perforated paper tape; 6 level advanced feed on ⅞" tape; 6, 7 or 8 level in-line feed on ⅞" or 1" tape

**Number of Keys**
88 keys—all on keyboard; 16 format keys

**Shift**
Available with either Teletype-setter* or secretarial shift keys
*TM of VariTyper Division

**Indicator Lights**
Power on-off; upper rail; shift; shiftout; upper magazine; magazine position 1, 2, 3 and 4; key split

**Controls**
Key split

**Punch Speed**
50 characters/second

**Last Word Delete**
Optional; deletes last word by a single keystroke

**Add 7 and Add 8**
Available with 8 level punch; adds 7 and/or 8 level code to standard TTS* or other code structure

**Dimensions**
Keyboard: Width 22"; Height 9⅛" (without copyholder)—17⅝" (with copyholder); Depth: 20", MCK Module: Width 12"; Height 9"; Depth 21"

**Weight**
Keyboard: 58 lbs.; MCK Module: 25 lbs.

**Power**
115 VAC; 50-60 HZ; 230 VAC; 50 HZ (optional)

**Color**
Beige and gray
